	Yellow Fever	0	0	0	0	0	0
Zika Virus Infection	0	1	3	3	4	4	

- ★The weekly and cumulative total numbers include indigenous and imported cases of notifiable infectious diseases.
- The following 8 chronic diseases are excluded from the table: MDR-TB, Tuberculosis, Syphilis, Gonorrhea, HIV Infection, AIDS, Hansen Disease and Creutzfeldt-Jakob Disease.
- Numbers of mumps and tetanus cases are summed up by the week of report.
- Since 2016/1/22, "Zika Virus Infection" was listed as a Notifiable Infectious Disease.

Suspected Clusters

- Eighteen clusters were reported, including 4 tuberculosis clusters, 5 diarrhea clusters, 4 upper respiratory tract infection clusters and 5 influenza-like illness clusters.

Imported Infectious Diseases

- 15 confirmed cases were imported from 6 countries during Week 31 of 2017.

Disease	Country						Total
	Philippines	Indonesia	Vietnam	Hong Kong	French Polynesia	Equatorial Guinea	
DF	4	1	3		1		9
Amoebiasis		2					2
Shigellosis				1			1
Chikungunya Fever	1						1
Hepatitis A				1			1
Malaria						1	1
Total	5	3	3	2	1	1	15

Note: The statistics listed in this table include imported cases that were either **confirmed** or **updated** in the previous week.

- A total of 412 confirmed cases were imported from 28 countries in 2017.
- Top 3 imported diseases : Dengue fever (161), Amoebiasis (117), Shigellosis (40).
- Top 3 countries responsible for most imported cases : Indonesia (154), Vietnam (55), Philippines (48).

Summary of Epidemic

- **Enterovirus** : The enterovirus epidemic season has begun. Most reported cases are mild cases. The number of severe cases may increase. EV71 is still circulating in the community.
- **Influenza** : The influenza activity has continued to decline and is expected to approach baseline by mid-August.
- **Japanese Encephalitis** : The Japanese encephalitis epidemic season has begun. Although the endemic areas are primarily central and southern Taiwan, sporadic cases are expected to occur in the other cities and counties.
- **Scrub Typhus** : The scrub typhus epidemic season has begun. Although the newly reported cases are primarily from Hualien County, Taitung County, Kinmen County and Penghu County, sporadic cases are expected to occur in the other cities and counties.
- **Dengue Fever** : Epidemics in Southeast Asia are slowly on the rise. As new indigenous dengue fever cases have been confirmed in Taiwan, the risk of imported and indigenous epidemics is elevated.
