	Yellow Fever	0	0	0	0	0	0
Zika Virus Infection	1	0	2	2	3	3	

- ★The weekly and cumulative total numbers include indigenous and imported cases of notifiable infectious diseases.
- The following 8 chronic diseases are excluded from the table: MDR-TB, Tuberculosis, Syphilis, Gonorrhea, HIV Infection, AIDS, Hansen Disease and Creutzfeldt-Jakob Disease.
- Numbers of mumps and tetanus cases are summed up by the week of report.
- Since 2016/1/22, "Zika Virus Infection" was listed as a Notifiable Infectious Disease.

Suspected Clusters

- Forty-five clusters were reported, including 8 tuberculosis clusters, 6 diarrhea clusters, 14 upper respiratory tract infection clusters, 16 influenza-like illness clusters and 1 fever of unknown origin cluster.

Imported Infectious Diseases

- 14 confirmed cases were imported from 8 countries during Week 28 of 2017.

Country Disease	Vietnam	Malaysia	Thailand	China	Myanmar	Korea	Indonesia	Philippines	Total
DF	3	2	2		1			1	9
Hepatitis A			1			1			2
Amoebiasis							1		1
Zika	1								1
Hepatitis E				1					1
Total	4	2	3	1	1	1	1	1	14

Note: The statistics listed in this table include imported cases that were either **confirmed** or **updated** in the previous week.

- A total of 360 confirmed cases were imported from 25 countries in 2017.
- Top 3 imported diseases : Dengue fever (130), Amoebiasis (104), Shigellosis (36).
- Top 3 countries responsible for most imported cases : Indonesia (138), Vietnam (42), Philippines (40).

Summary of Epidemic

- Influenza** : Mild influenza activity has reached its peak and is expected to gradually slow down. According to past epidemics, the incidence of severe cases will decrease after mild influenza activity appears to be ebbing.
- Scrub Typhus** : The scrub typhus epidemic season has begun. The newly reported cases are primarily from Taitung County and Kinmen County.
- Japanese Encephalitis** : The Japanese encephalitis epidemic season has begun. Although the endemic areas are primarily central and southern Taiwan, sporadic cases are expected to occur in the other cities and counties.
- Enterovirus** : Currently, mild enterovirus activity has remained similar to that last week. The number of severe cases may increase. EV71 is still circulating in the community.
- Dengue Fever** : Epidemics in Southeast Asia are increasing gradually. As the rain has continued to occur across Taiwan, the risk of imported and indigenous epidemics is elevated.
