- Dengue Fever:** The epidemics of Dengue in Southeast Asia are increasing. There has been one confirmed indigenous dengue case in Southern Taiwan. As the temperature and rainfall increases, the risk of dengue fever for both imported and indigenous cases is expected to be higher.
- Japanese Encephalitis:** Taiwan is in the midst of Japanese encephalitis season. New cases are primarily in central and southern Taiwan.
- Scrub Typhus:** Taiwan is in the midst of scrub typhus season. The current primarily affected areas include Hualien County and Taitung County.
