

Summary

According to the laboratory surveillance¹, the number of enterovirus isolates continued to be low in the past 4 weeks (Figure 1). During week 31, the total number of outpatient and ER visits for enterovirus infection was 419, which was far below the national baseline (11,000 visits), show as Figure 2.

As of August 8, 2022, no new EVSC² case was confirmed in 2022(Figure 3).
