

Summary

According to the laboratory surveillance¹, rhinovirus was dominant during recent weeks (Figure 1). During week 39, the total number of outpatient and ER visits for enterovirus infection was 541, which was far below the national baseline (11,000 visits), show as Figure 2.

As of October 3, 2022, no new EVSC² case was confirmed in 2022(Figure 3).

For further information, please visit the Taiwan National Infectious Disease Statistics System (NIDSS) website at https://nidss.cdc.gov.tw/en/Home/Index?op=1
