

**Summary**

According to the laboratory surveillance<sup>1</sup>, the number of enterovirus isolates continued to be low in the past 4 weeks (Figure 1). During week 33, the total number of outpatient and ER visits for enterovirus infection was 555, which was far below the national baseline (11,000 visits), show as Figure 2.

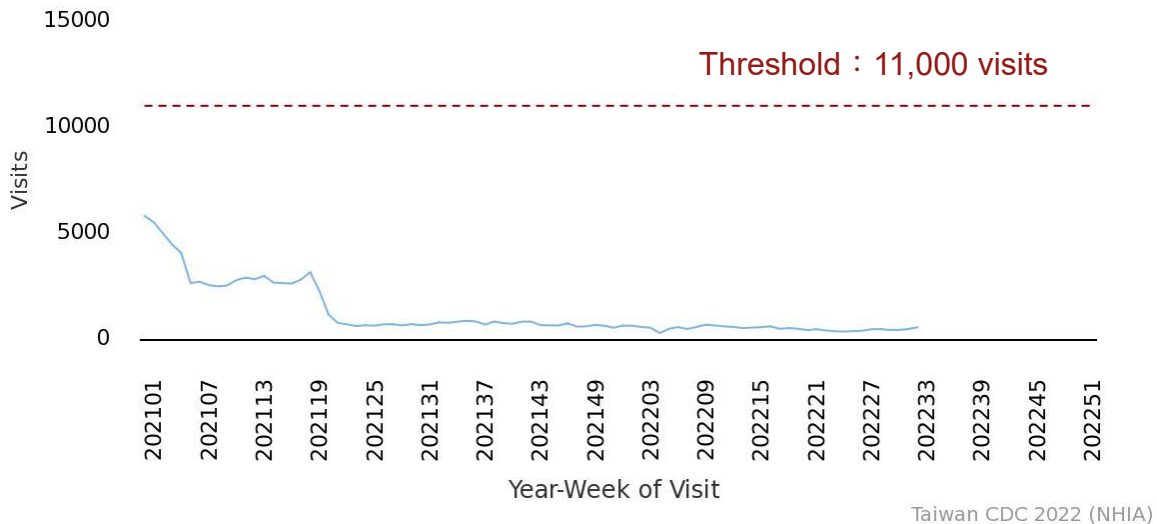

As of August 22, 2022, no new EVSC<sup>2</sup> case was confirmed in 2022(Figure 3).
