

Anti-epidemic Measures  
COVID-19 Vaccines Decoded

Part 2

# What is vaccine protection?

# Vaccine Protection

**Compared with unvaccinated individuals, vaccine reduces the risk of infection, severe case or death**

# How long does it take for the vaccine to achieve protection?

**The individual is protected  
two weeks after being  
fully-vaccinated**

# Can you compare the protection among different vaccines?

**Each vaccine adopts different clinical trial procedures and indicators. Therefore, direct comparison is not feasible**
