- ★The weekly and cumulative total numbers include indigenous and imported cases of notifiable infectious diseases.
- MDR-TB, Tuberculosis, Syphilis, Gonorrhea, HIV Infection, AIDS, Hansen's Disease and Creutzfeldt-Jakob Disease are excluded from the table.
- Numbers of mumps and tetanus cases are summed up by the week of report.
- Since 2022/6/23, "Monkeypox" was listed as a Notifiable Infectious Disease.

Suspected Clusters

Six clusters related to diarrhea (4), tuberculosis (2) were reported during week 32.

Imported Infectious Diseases

- There were 1560 imported cases from 39 countries during week 32.

Severe Pneumonia with Novel Pathogens: 1555 cases from Vietnam (113), USA (58), Thailand (42), Singapore (33), the Philippines (31), Canada (27), Japan (21), Malaysia (15), Cambodia (15), Korea (12), Hong Kong (10), and the remaining 28 countries have less than 10 cases, 1076 unknowns.

Dengue Fever: 5 cases from Vietnam (3), Thailand (1), and Singapore (1).

- During week 1-32, there were 20962 imported cases from 123 countries. The top three countries are Vietnam (2776), USA (1887), Indonesia (1113).
- During week 1-32, the notifiable diseases with the highest number of imported cases are Severe Pneumonia with Novel Pathogens (20900).

Summary of Epidemic

- **Severe Pneumonia with Novel Pathogens :** Taiwan is in the stage of widespread transmission of COVID-19. The new cases of the Omicron subvariants BA.5 continue to appear in community, and the COVID-19 cases raise in Northern Taiwan. Omicron BA.5 subvariants has been dominant in global and spread in many countries, and the increase of international travel during summer vacation, therefore it is expected that the number of imported cases and the risk for local transmission will raise.
- **Japanese Encephalitis:** Taiwan is in the midst of Japanese Encephalitis season, individuals living in all counties in Taiwan are at risk of infection.
