

### Summary

According to the laboratory surveillance<sup>1</sup>, the number of enterovirus isolates continued to be low in the past 4 weeks (Figure 1). During week 13, the total number of outpatient and ER visits for enterovirus infection was 560, which was far below the national baseline (11,000 visits), show as Figure 2.

As of April 5, 2022, no new EVSC<sup>2</sup> case was confirmed in 2022(Figure 3).
